Imaginant Announces a New Digital Camera

Imaginant HR-200c Digital Camera

ROCHESTER, NY, USA (May 16, 2005) – Imaginant Inc., a leading innovator in the development of high quality industrial and scientific digital camera products, is now shipping a 2 Megapixel Color digital camera, the HR-200c.

Photographic quality images produced by the HR-200c's 2 Megapixel Interline CCD Imager are ideal for detailed image analysis and for high-quality hardcopy print output. The image quality is maximized through the high-speed electronic shutter that freezes scene action.

The HR-200c color digital camera features a Gigabit Ethernet Interface that serves both image data transfer and camera control. The camera offers remote control of EF-compatible lenses via the Ethernet Interface, and control over both the lens focus and lens aperture is provided.

The Imaginant HR-200c camera is well suited for use in various image intensive applications that require color, high-resolution images quickly. Users in the surveillance, security, digital portraiture, medical, scientific imaging and microscopy markets will benefit from the cameras' ease of use and outstanding image quality.

About Imaginant Inc.

Imaginant Inc., a privately held company was founded in 1986 in Rochester, N.Y. The company designs, develops and manufactures a variety of digital cameras and other imaging equipment. Imaginant also produces industrial and scientific ultrasonic measuring devices under the JSR Ultrasonics brand.
